Acquire information

Disaster prevention administration radio system

The town utilizes outdoor loudspeakers to simultaneously broadcast emergency information related to events that could be a threat to life, body, and property, such as fire, earthquake, flood, or crime prevention. There is also a telephone response service for your convenience if information from the loudspeakers is difficult to hear.

Toll-free number

Disaster prevention information email service

Depending on your location or weather condition, etc., the disaster prevention administration radio system may be difficult to hear. This email distribution service is for those who wish to recheck the contents of the broadcast through your cellphone or PC pre-registered email address. To register, send a blank mail to p-bousaikamisato@m.bmb.jp, from the cellphone or PC you wish to receive the Kamisato Town Disaster prevention information.

LINE

Emergency information such as disaster information is distributed through “LINE”, a communication app provided by LINE Corporation.

■ How to use: When using “Kamisato Town LINE Official Account”, you need to install the “LINE” app in your smartphone, etc. and add Kamisato Town as your friend on the “Add Friends” screen. Install the “LINE” app on your device from the website on the right.

■ Add Friends: If you already have the “LINE” app installed, login to LINE and follow one of the two methods below to add Kamisato Town to your friends list.

(1) From “Add Friends” in Menu, select “ID search” and search “@kamisato”, and add to friends list.

(2) From “Add Friends”, select 2D code” and read in the 2D code on the right, and add to friends list.
